

## **2022 Legislative Agenda**

### **COVID-19**

- ❖ Promote and participate in opportunities that serve to explore and address the issue of health disparities, especially among historically underrepresented populations from diverse racial, ethnic and gender backgrounds, and advocate for needed change.
- ❖ Support access to PPE for all physicians and healthcare workers.
- ❖ Advocate for low cost COVID-19 testing in NY, especially for historically underrepresented population, and oppose funding cuts to public healthcare programs including Medicaid.

### **Access to Care**

- ❖ Seek telehealth expansion that includes payment parity, keeps telehealth delivery locations unrestricted for patients and physicians, and expands technology platforms across all payer types (public and private).
- ❖ Engage in the development and testing of alternative payment models and encourage identification and alignment of outcome-based metrics across all payers that are relevant to all physician practice types, sizes and settings.
- ❖ Address the shortage and maldistribution of the physician workforce through: adequate funding of graduate medical education, physician loan forgiveness, scholarships, expenses for practice start-up and ambulatory care training, and an increase in the number of residency training slots. Seek to establish policies for economic development that apply to community-based physician practices to enhance health care as a value proposition.
- ❖ Engage policymakers to ensure the continuing viability of independent practices, regardless of size.
- ❖ Seek and support legislation to mandate use of standardized forms and data collection and reporting rules across all payers to reduce regulatory and administrative burdens, which often lead to physician burnout and add to cost.
- ❖ Support legislation to remove barriers and increase access to mental health services.
- ❖ Work with NYS legislators and regulatory representatives to facilitate access to primary care physicians for all people living in New York, and especially patients experiencing health disparities.

### **Quality of Care and Patient Safety**

- ❖ Seek opportunities for quality improvement and enhanced patient safety through voluntary reporting, care coordination, collaboration, and team-based care and assure protection for

physicians who perform peer review functions.

- ❖ Support comprehensive medical liability reform and development of alternative systems for dispute resolution in medical liability cases, including models such as health courts and workers' compensation or no-fault systems.
- ❖ Support and promote financing and expanded opportunities for clinical research among physicians, institutions and patients, especially for historically underrepresented populations from diverse backgrounds.
- ❖ Eliminate barriers and ensure low threshold access to medications that treat substance abuse disorders including, but not limited to, opioid, alcohol, and other substances.

## **Public Health and Health Care Delivery**

- ❖ Encourage and support evidence-based practice to achieve an appropriate balance between population health and individual well-being using principles of high-value, cost-conscious care.
- ❖ Support healthy lifestyles across the continuum of patient care through; prevention, identification of barriers and management of chronic conditions including integration of behavioral health; prevention of and treatment for substance use disorders including tobacco use. Support a patient-centered approach to care, that includes utilization of harm reduction practices, to engage persons where they are at on the continuum of care.
- ❖ Advocate for responsible environmental policies that promote public health including, but not limited to, mitigation of climate change.
- ❖ Encourage programs to improve adult immunization rates, provide vaccination information and education for patients, and remove barriers to immunization.
- ❖ Support measures to strengthen preparedness for environmental disasters and outbreaks of infectious disease.
- ❖ Advocate for tobacco prevention and cessation inclusive of all electronic delivery platforms.
- ❖ Evaluate and support proposals targeted toward reducing firearm injuries and deaths.
- ❖ Support evidence-based solutions for reducing health care disparities and proposals to eliminate racial injustices in healthcare.
