**Candidate Statement:**

I have been a practicing Primary Care Internal Medicine and Obstetric Medicine, which involves caring for patients with medically complex pregnancies, for nearly 25 years. I believe this background provides a unique perspective in Internal Medicine that I will be able to use for the advancement of the work of the ACP. The ACP, and specifically the NYACP, have been an

important part of my professional experience. Membership in ACP has enriched both my personal and professional life. I have developed leadership skills as an NYACP District Councilor and member of various committees. The mission of the ACP plays a crucial role in the practice of Medicine in relation to education, advocacy, and patient safety. I remain committed to this work as a clinician and an educator, and hope to continue that work on behalf of my fellow physicians as ACP Governor for Upstate New York.
