Candidate Statement:

I am honored to be nominated for Governor of NYACP. I have been involved with ACP for over 20 years, but there is no more crucial time for our organization than right now. As physicians in New York, you have all demonstrated your selflessness, compassion, and leadership during the COVID-19 pandemic. ACP is poised to help lead our profession in this new era in healthcare – one that prioritizes safety, patient-centered care, and a broader dependence on remote care and Telehealth. Physicians must be supported in our role in this transition, and I will advocate for your ability to provide the best care for your patients, no matter the setting. In addition, recent events

have served to shine a light on the healthcare disparities that still exist in our state. As Governor, I look forward to working with NYACP to address inequity and ensure the highest quality of care for all patients. I take tremendous pride in having the opportunity to represent you – our incredible ACP membership – at this critical moment.
